# AKHILESH VADAKKEKKARA

Full Stack Developer | PHP | Laravel | Python | React | Vue.js | MySQL | AWS
Kochi, Kerala, India | +91 9526117719 | akhileshakhil96.aa@gmail.com | aki961996.github.io/my_portfolio

## PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building secure, scalable web applications with PHP (Laravel), Python (Django, Frappe Framework), React.js, and Vue.js. Specialized in RESTful API design, MySQL database design and query optimization, and authentication with JWT and role-based access control. Experienced in third-party integrations, including Stripe and Cashfree payments, cloud telephony, and Aadhaar and RC verification APIs. Improved application performance by up to 40% through query optimization. Deploys applications on AWS EC2, with hands-on Docker, Nginx, and Redis experience. Began career in Linux and server administration, bringing a strong foundation in deployment and production support.

## TECHNICAL SKILLS

**Back-End:** PHP, Laravel, Livewire, CodeIgniter, Python, Django, Frappe Framework, RESTful API Design, MVC Architecture, Eloquent ORM
**Front-End:** JavaScript (ES6), React.js, Vue.js, HTML5, CSS3, Bootstrap, jQuery, AJAX, Responsive Web Design
**Database:** MySQL, Database Design, Query Optimization, Indexing, Data Migration, Redis
**Authentication and Security:** JWT, Laravel Sanctum, Role-Based Access Control (RBAC)
**Cloud and DevOps:** AWS (EC2), Docker, Docker Compose, Nginx, Apache, Linux (Ubuntu)
**Version Control:** Git, GitHub, GitLab, Bitbucket
**Integrations:** Stripe and Cashfree Payment Gateways, Bonvoice Cloud Telephony, Aadhaar and RC Verification APIs, Third-Party REST APIs, ERPNext

## PROFESSIONAL EXPERIENCE

### Software Engineer, Faircode

*Kochi | Dec 2025 - Present*

- Develop and maintain enterprise web applications using PHP (Laravel), Python (Frappe, Django), React.js, and Vue.js.
- Customize and extend ERPNext modules on the Frappe Framework to fit client business workflows.
- Estimate and deliver back-end features with clean, maintainable, well-documented code.
- Build reusable components and libraries, and help define the team's back-end conventions and design patterns.
- Review code, debug production issues, and tune performance across multiple client projects.
- Follow Git-based versioning and deployment procedures, and test features before each release.

### Laravel Full Stack Developer, ArrowClouds

*Remote | Jan 2025 - Dec 2025*

- Designed and built secure RESTful APIs in Laravel consumed by React.js and Vue.js front-ends.
- Implemented authentication, authorization, and role-based access control using Sanctum and JWT.
- Optimized MySQL schemas and queries to improve database performance and scalability.
- Maintained clean, readable code following Laravel conventions and team review standards.

### Full Stack PHP/Laravel Developer, TechMaven IT Solutions Pvt Ltd

*Kakkanad, Kochi | Oct 2022 - Mar 2025*

- Built academic, administrative, and finance modules for a large-scale School Management System, ERP, and eCommerce platforms using Laravel and Livewire.
- Integrated Stripe for online fee payments.
- Implemented role-based access control for multiple user types.
- Optimized database queries and indexing, improving application performance by up to 40%.
- Deployed and maintained applications on AWS EC2 with Apache on Ubuntu.
- Built AJAX-driven dynamic forms to improve data entry speed and user experience.

### System Administrator, Plaza Foods Company

*Palakkad, Kerala | Jan 2019 - Dec 2021*

- Installed and configured Linux (Ubuntu) and Windows Server environments and Apache web servers.
- Performed routine system monitoring, backups, and log analysis to maintain uptime.

### System Administrator, Techno World Computer Digital Technology

*Palakkad, Kerala | Jan 2018 - Dec 2019*

- Monitored system performance and security; installed, upgraded, and configured software and hardware.

## PROJECTS

**Car Parking Management System (Monolithic) | Laravel, JavaScript, MySQL, Cashfree, REST APIs**

- Built login and authentication for two user types with role-based access.
- Integrated the Bonvoice cloud telephony API to handle calls for both registered and non-registered users.
- Integrated the Cashfree payment gateway for online payments.
- Integrated Aadhaar and vehicle RC (Registration Certificate) verification APIs.

**Microservices Learning Project | Laravel, Docker, Nginx, Redis, MySQL, JWT | github.com/aki961996/laravel-microservices-demo**

- Built a microservices system with separate Laravel services for authentication, parking bookings, and notifications, each with its own database.
- Implemented stateless JWT authentication, with services verifying tokens independently using a shared secret.
- Routed all traffic through an Nginx API gateway as a single entry point.
- Used a Redis queue for asynchronous booking notifications, so bookings succeed even when the notification service is down.
- Containerized all services with Docker Compose.

**School Management System | Laravel, MySQL, JavaScript, Bootstrap**

- Built a full-featured system covering students, teachers, classes, attendance, exams, fees, timetable, and notices.
- Implemented secure authentication, RBAC, REST APIs, and optimized relational database queries.

**Doctor Appointment Booking System | Laravel, React.js, MySQL, REST API**

- Built a booking platform where patients search doctors, view availability, and book appointments.
- Developed RESTful APIs in Laravel with a React.js front-end, including authentication and slot-conflict validation.

**Shipbuilding Management Application | Python, Vue.js**

- Developed a shipbuilding application with a Python back-end and Vue.js front-end to manage project workflows and records.
- Built REST APIs connecting the Python back-end to responsive Vue.js interfaces.

**Expo Management System | Laravel, JavaScript**

- Built an application to manage exhibitions, including exhibitors, stalls, and event registrations.

**Visitor Management System | Laravel**

- Developed a system to register visitors, track check-in and check-out, and maintain visit records.

**Fintech Money Management Application | Laravel, JavaScript, MySQL**

- Built a money management application to record transactions, track income and expenses, and generate summaries.

## EDUCATION

- **B.Sc. Computer Science**, San International College, Coimbatore
- **PHP Developer Certification** (Web Development: PHP, Laravel, JavaScript, jQuery), Gtech, Palakkad, Kerala | 2021 - 2022
